PIMPLY? WELL, DON'T BE!

People Notice It. Drive Them Off with Dr. Edwards' Olive Tablets

A pimply face will not embarrass you much longer if you get a package of Dr. Edwards' Olive Tablets. The skin should begin to clear after you have taken the

tablets a few nights. Cleanse the blood, the bowels and the liver with Dr. Edwards' Olive Tablets, the successful substitute for calomel; there's never any sickness or pain after taking them. Dr. Edwards' Olive Tableta do that

which calomel does, and just as effectively, but their action is gentle and safe instead of severe and irritating. No one who takes Olive Tablets is

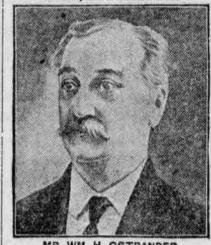

ever cursed with "a dark brown taste," a bad breath, a dull, listless, "no good" feeling, constipation, torpid liver, bad disposition or pimply face.

Dr. Edwards' Olive Tablets are a purely vegetable compound mixed with olive oil; you will know them by their olive color.

Dr. Edwards spent years among pa-tients afflicted with liver and bowel complaints, and Olive Tablets are the

immensely effective result. Take one or two nightly for a week See how much better you feel and look 10c and 25c per box. All druggists.

Cause for Regret.

That the mayor of New York has felt obliged to ask the army and navy authorities for assistance in preventing disorder by soldiers and sailors, and that his police commissioner has felt obliged to threaten the use of "nightsticks, revolvers or perhaps machine guns" to combat it, is cause for regret In New York, while the majority of he people were celebrating the victorie

of allied arms, a minority have been celebrating the accomplishments of Rus sian and German revolutions. They have met and paraded under the red flag and have proclaimed that flag their own. Theoretically the red flag is the syn bol of international brotherhood. Practically it is the symbol of class revolu- and Without the Blister

It is not surprising that boys in uniform with more ardor than discrimination, hould have become self-appointed censors of the red flag and should have believed in tearing down the flag where they found it and attacking those who bore it. But the very principles of law and order, of which they hold themselves the champions, forbid that boys in uniform should fight without orders as free-lancers at the command of their

motions. It does not matter that they, or the creat majority of Americans, disbelieve radical socialism and bolshevism and the red flag. To break up parades and break into meetings is disorderly conduct, without right or sanction. And it is a very poor way to fight the pur-poses which the red flag stands for .-

Enter Ambassadress Schwimmer-An Expert in Gold and Secret Documents.

The new republic of Hungary has given a reward to feminism and injected desirable "jazz" into the stagnant art of diplomacy by the appointment of Mme Rosika Schwimmer as ambassador, or dress, to Switzerland, Mme. Schwimmer is mistress of the high, the middle, and the low diplomacy; an expert in the secret and the public, the open and the shut. From every point of view it is a crafty appointment. For one thing, ambassadors take precedence over ministers. France is the only other nation which maintains an embassy in Switzer-land, and surely the French ambassa-dor would yield the doyenage of the diplomatic corps to a lady.

Mme. Schwimmer will be an ambassa dor of the type beloved by the writers of a certain school of fiction. Diplomacy, according to these fictioneers, consists largely of gold and secret documents. Mme. Schwimmer is an expert on secret documents-instance the famous papers proving that the warring governments were only waiting for Henry Ford to come over and ask them to stop; which ceeded in luring an automobile manufacturer into angelship and the expenditure of three-quarters of a million dolfars. Few greater diplomatic triumphs are recorded in recent history than that of the lady whose lecture tour had brok-en down and left her stranded in Detroit, and who yet used this fortuitous catastrophe to put herself at the head of an expedition that spent more money foolshly than any other of our times. Sets a Fashion in Wireless.

Mme. Schwimmer, on the expedition preserved the principles of diplomatic secrecy with regard to her plans and her facilities for stopping the war. She sedulously withheld facts from the public, but carried with her a dozen of of private Creels who discharged by wireless every night many thousands of words on the ambient atmosphere, presenting the news from her official viewpoint and clogging the channels of comnunication on which disinterested chroniclers depended. She seems to have set a fashion

Like a good ambassador, good at least according to the Central European tradition, she knew how to foment enthusiasm for her cause. Who can forget the pontaneous outpouring of citizens of Copenhagen to sing "The Star Spangled Banner" in Danish as the Ford party left town-thrifty Danes hired for the purpose at the price of 1500 crowns? It is true that it were easy enough to point out that this manly defense of the constitutional rights of American citizens to a free press comes after a vigorous assertion of these rights by the press, and also after certain pointed questions submitted in Congress as to whether or not the taking over of the cables by Burleson and the creation of the Creel outfit of "interpreters" rep resented a scheme for tampering with the news of the conference, but why be disagreeable enough so much as to suggest that the American press has, by diminied protest, won a real vic-
